DETAILED ACTION

Election/Restrictions

This application contains claims 6-9 and 27-30 drawn to nonelected inventions. In Paper No.13, dated January 27, 2003, applicant elected to prosecute Group I, Method Species 2, and Product Species 1. Furthermore, it was stated that all claims in Group I read upon the elected species. However, claims 6-9 and 27-30 do not read upon the elected species.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Frazier (US 3,367,326). Frazier discloses a method of providing access to a series of adjacent vertebrae located within a human lumbar and sacral spine, by accessing an anterior sacral target point (Fig. 4). Fig. 4 illustrates boring a curved bore.

Allowable Subject Matter

Claims 22-26 are allowed.

Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
